SUMMARY

Machine Learning Engineer aspirant with hands-on experience training and evaluating deep learning models across computer vision and reinforcement learning using PyTorch. Comfortable owning a problem end-to-end—framing, experimentation, evaluation, and iteration—rather than just consuming pretrained APIs.

EDUCATION

G.L. Bajaj Institute of Technology and Management <i>B.Tech in Information Technology</i>	2023–2027 CGPA: 7.40
Allahabad Agriculture Institute <i>Class XII (UP Board)</i>	2021 70.2%

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, C
Machine Learning: Regression, Classification, Decision Trees, Random Forest, SVM, KNN, Naive Bayes, Clustering, PCA, Feature Engineering, Model Evaluation
Deep Learning / AI: ANN, CNN, RNN, LSTM, Transformers, Computer Vision, NLP, LLMs, Generative AI, Reinforcement Learning, Agentic AI
Frameworks / Libraries: PyTorch, TensorFlow, Scikit-learn, Gymnasium, Pandas, NumPy
Tools & Visualization: Git, GitHub, Jupyter Notebook, VS Code, Linux/Unix, Matplotlib, Seaborn, Power BI, Excel
Core CS: Data Structures & Algorithms, OOP, DBMS, EDA, ETL, JSON

PROJECTS

Flappy Bird AI using Deep Q-Network (DQN) | *PyTorch, Gymnasium, Reinforcement Learning*

- Built a DQN agent using PyTorch with Experience Replay and Target Network synchronization for autonomous gameplay.
- Optimized hyperparameters and GPU training to improve learning stability and episodic reward.

Cat vs. Dog Image Classification using CNN | *PyTorch, Computer Vision*

- Built and trained a CNN on the Oxford-IIIT Pet dataset for binary image classification.
- Performed preprocessing, augmentation, evaluation, and model optimization to improve accuracy.

Retrieval-Augmented Generation (RAG) System | *Python, LangChain, FAISS, Gemini*

- Built an end-to-end RAG pipeline with PDF ingestion, embeddings, FAISS vector search, and LLM-based QA.
- Implemented document chunking, semantic retrieval, and prompt orchestration using LangChain.

Dialogue Text Summarization using T5 | *PyTorch, HuggingFace, FastAPI*

- Developed a T5-based dialogue summarization model on the SAMSum dataset.
- Deployed the model using FastAPI with REST APIs and an interactive web interface.

CERTIFICATIONS

• Oracle Agentic AI Foundations Associate	2026
• Oracle AI Database Certified Foundations Associate	Jul 2026
• AWS Academy Graduate – Cloud Foundations	Apr 2026
• BCG X Data Science Job Simulation (Forage)	2026
